

STUDENT FURNITURE

2026 COLLECTION

DORMS
& DIGS

WELCOME TO DORMS & DIGS

We are a UK-made bedroom furniture partner trusted by PBSA operators & boarding schools to deliver compliant, durable and cost-effective living spaces that perform long after handover.

We design and manufacture student bedroom furniture with one purpose: to reduce maintenance, replacement cycles and operational risk while improving the everyday experience for students.

 **MADE IN
BRITAIN**

Every range we produce is built for heavy use, strict compliance and long-term asset value. Combining robust construction, guaranteed spares and reliable UK manufacturing to give estates teams, finance directors and project teams confidence that their investment will continue to perform year after year.

“

We believe in creating
Student Furniture That's
Built to Last The rigors of
Student Living.

BEDROOM FURNITURE COLLECTIONS.//

HAVEN'S REST

Comfortable, durable and functional pieces perfect for creating a personal sanctuary in any student room.

Price Band

HAVEN'S REST

Our starter level bedroom range is no fuss, no nonsense and robust. Equally, this range is made to a high specification to create comfort with 18mm thick MFC board & 2mm edging as standard with finishes that are scratch resistant.

Saving your budget by added door fronts to only the wardrobe, desk and chest of drawers. Three open cubby under the bed and the bedside table and handleless 'pull to open' doors.

STUDY SPACES.//

Dorms & Digs designs and manufactures durable, purpose-built joinery and furniture for common spaces across PBSA schemes and education environments — from lounges and study areas to kitchens, social hubs and shared circulation spaces.

We manufacture purpose-built study space joinery for boarding schools, PBSA and education environments. Creating calm, functional and durable areas that support focused study while standing up to constant daily use.

Study spaces are some of the most intensively used areas within student accommodation, often operating from early morning through late evening. Our joinery is designed with this reality in mind — balancing robust construction, thoughtful ergonomics and practical detailing to ensure long-term performance without creating unnecessary maintenance burden.

All study space joinery is UK-manufactured using durable, easy-clean materials selected for longevity and consistent appearance. Desks, shelving, screens and integrated storage are carefully detailed to reduce wear points, protect surfaces and maintain a clean, organised environment over time.

Whether delivered as standardised solutions across multiple buildings or bespoke joinery for libraries, quiet zones or collaborative study areas, Dorms & Digs provides reliable, low-maintenance study furniture that supports student wellbeing, reduces operational disruption and performs well beyond handover.

KITCHEN JOINERY.//

Student kitchens are some of the highest-wear spaces across an estate, exposed to heat, moisture, heavy use and frequent turnover. Our kitchen joinery is designed specifically for this environment — prioritising strength, practicality and ease of maintenance without compromising on a clean, contemporary appearance.

All kitchen joinery is UK-manufactured using carefully specified carcasses, doors and finishes selected for moisture resistance, impact durability and long-term serviceability. Fixings, edges and interfaces are detailed to reduce failure points and support safe, compliant operation over time.

We can deliver standardised kitchen layouts across multiple buildings or bespoke solutions for shared and cluster kitchens. We provide reliable, low-maintenance kitchen joinery that reduces replacement cycles, limits disruption and supports estates teams for years to come.

COMMON SPACES //

We understand that common areas experience some of the highest levels of wear across an estate. Our approach balances robust construction with considered design, ensuring spaces remain functional, compliant and visually strong long after handover.

We produce practical, well-engineered common space furniture that reduces replacement cycles, minimises operational disruption and supports a positive student experience.

All joinery is UK-manufactured using carefully selected materials and finishes chosen for durability, cleanability and long-term performance. Designs are developed with estates teams in mind — prioritising repairability, repeatability and ease of maintenance while supporting the way students actually use shared spaces.

From early concept through manufacture and delivery, we work closely with project teams to ensure common spaces perform as hard as the bedrooms that support them.
